

Announcing the Distance Learning Oak Street Science Expo!

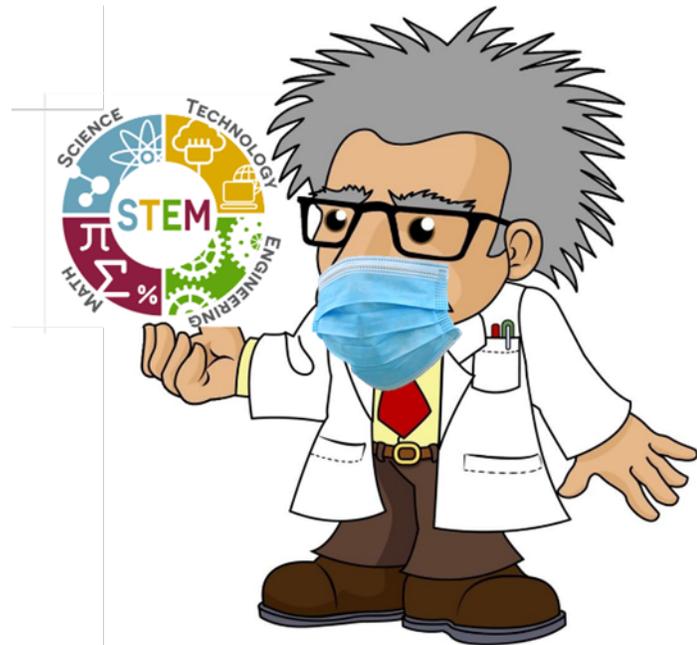

Due to the need for continued social distancing, we will not be able to have the traditional Science Expo at Oak Street School. However, we want to celebrate and share the effort your students have made in preparation for this year's Science Expo.

To participate, please share a short video (2 minutes or less) or photographs of your students work with us. We will take all materials and create a Science Expo video that highlights the projects that can be viewed by students and families from home. It is not necessary for groups to get together for submission, each team can send separate videos that we will edit together if needed.

Please let Gary know if you would like to share your project and send him your video or pictures by **April 10th**. A Science Expo video featuring all the science projects will be shared with all Oak Street School members at the end of April or early May.

How to Participate:

1. Prepare a video or send pictures that have the following information:
 - a. My (our) project was on ___TITLE___
 - b. It involved.....
 - i. Making...
 - ii. Building...
 - iii. Learning about...
 - iv. Testing...
 - v. Discovering...
 - c. We (I) learned ...
 - d. Tell us the most exciting thing about what you did, keep it simple!
2. Send the materials to Gary (gsarkis@gmail.com)

3. Please reach out to Gary if you have questions!
4. Note: Only have your child appear in the video if you approve of their image appearing in the final video, otherwise just film the project or materials of the project as it is being described.

We'd love to see and share your child's work and look forward to sharing this solution for the Distance Learning Oak Street Science Expo!
